DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within *the range of 50 to 150 words*. It is important that the abstract not exceed *150 words* in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it is too long. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

Claims 1, 2, 4, 5 and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 2, 4, 5 and 7-10 are replete with errors under 35 U.S.C. 112, second paragraph too numerous to mention specifically; however, examples of these errors are as follows:

In claim 1, line 14, applicant claims "...i.e., the facing direction...". The phrase "i.e." (in example/in other words) renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

In claim 1, lines 15-16 and claim 4, lines 7-8, applicant claims "...the base end..." and in claim 1, line 22 and claim 4, line 18, applicant claims "...the inner rim...". In claims 9 and 10, line 3, applicant claims "...said crimping portion...". There is no prior mention of "a base end", "an inner rim" or "a crimping portion" and therefore the claimed subject matter lacks proper antecedent basis.

As mentioned above, these are *examples* of errors under 35 U.S.C. 112, second paragraph and each claim should be revisited and revised as necessary.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5 and 7-10 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fujita et al.'669.
